## USE ONLY FOR FILING A PROVISIONAL APPLICATION FOR PATENT

This collection of information is required by 37 CFR 1.51. The information is used by the public to file (and by the PTO to process) a provisional application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 8 hours to complete, including gathering, preparing, and submitting the complete provisional application to the PTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, Washington, D.C. 20231. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Box Provisional Application, Assistant Commissioner for Patents, Washington, D.C. 20231

THERAPEUTIC DECORATIVE OBJECT

1 The object has an exterior covering with a  
2 predetermined appearance, texture and feel that is  
3 psychologically attractive and camouflages its  
4 purposes. The object encloses multifunctional and  
5 multi-use therapeutic devices with interchangeable  
6 modules to provide drugless, naturopathic relief of  
7 tension, cramps, sleeplessness, musculoskeletal aches,  
8 stiffness, strains and sprains, minor burns, bumps and  
9 bruises, swelling, headaches, and the like by taking  
10 advantage of resources drawn from prior art  
11 therapeutic and naturopathic healing systems.

12 The present invention provides commercial  
13 articles to its users with therapeutic abilities to  
14 promote normal functioning of the body and mind, but  
15 does not display the utilitarian nature of the  
16 therapeutic devices which might cause embarrassment or  
17 be unappealing to a user. The invention provides a  
18 useful and pleasant article with multiple uses and  
19 functions for personalized use to provide relief for  
20 the individual's mind and body and to promote their  
21 well being and health.

22 The products include naturopathic toys, clothing,  
23 accessories, bedding, furniture, electronics and other  
24 decorative articles or combination thereof.

25 All embodiments have a decorative camouflaging  
26 cover configured to resemble a predetermined object.  
27 They may be shaped to conform to the proper alignment  
28 of the body to improve posture or to cover a  
29 predetermined area. The devices appear to the public  
30 as attractive and normal objects. Interchangeable  
31 modules allow therapeutic devices to be customized for  
32 an individual person and may include heating and/or  
33 cooling elements, an aromatic container, containers

60349732-012202

1 containing salts, seeds, herbs, grains, oils minerals  
2 etc., a body alignment element and/or magnets,  
3 bioelectromagnetic frequency elements (sound, light)  
4 ionizers, accupressure, massage, and other holistic  
5 elements.

6 Interchangeable interior and exterior pockets and  
7 containers may be used singularly or combined with one  
8 or more holders using a number of corresponding  
9 fastener systems. In a ladies handbag, for instance,  
10 one side may have a removable and closed container  
11 filled with solid or liquid material, such as rice,  
12 flax seed, sand, healing stones, water magnets or  
13 bioelectromagnetic element or cold/hot gel packs, to  
14 provide heating or cooling. Dry rice, for instance,  
15 when heated, produces moist heat to relieve a number  
16 of aches and pains while radioactive volcanic sand can  
17 be applied to enhance circulation and relieve  
18 arthritic pains. Hot mud, called "fango", such as  
19 used in spas, or liquids like mineral spring water  
20 combined with bioelectromagnetic energy and herbs  
21 using different heating or cooling methods can be  
22 applied as compresses or used for inhaling purposes.  
23 Moisture, aroma and radiation can be used in any  
24 combination to achieve the desired heated effect. The  
25 container may be heated or cooled externally to a  
26 desired temperature in a microwave or freezer or by  
27 chemical reaction or by electrically heating or the  
28 like. The invention may additionally utilize a  
29 thermostat with or without a dial and/or temperature  
30 gauge. The invention may also provide an aromatic  
31 essence holder with an insert located in the proximity  
32 of the heating element to provide combined effects of  
33 the heat with the essence. Containers in the  
34 decorative support may also contain magnets, massage,

6034573E "01EEUE

1 liquid soak naturopathic cloth, or accupressure  
2 elements. So, for example, one side of the ladies bag  
3 may be warmed or cooled as desired, the aroma holder  
4 at the top may be filled with the desired aroma  
5 essence, while the other side of the bag may have a  
6 container with magnets. The ladies bag can also be  
7 used with battery operated massage (vibrator) inserts  
8 or accupressure (plastic balls) inserted in  
9 a desired location, for example, against the lower  
10 back.

11 According to the invention there is provided a  
12 universal decorative object containing multi-use,  
13 multi-function and multi-purpose modules to enhance  
14 the quality of life for the user.

15 For children, therapeutic toys may be used to  
16 comfort, heal and to ensure good posture and health.  
17 They promote recovery after illnesses, accidents and  
18 traumas or even enhance learning abilities and good  
19 night sleep. The toys may be anatomically shaped in  
20 designs to improve posture combined with pleasing  
21 aromas to relieve cold and allergy symptoms and  
22 thermal applications to keep children warm while  
23 walking to school in winter containing naturopathic  
24 ingredients known to prevent and help the body  
25 naturally heal itself. Naturopathic toys are used to  
26 help balance the mind and systems of the body.

27 A toy may be any size, shape or color and made  
28 out of materials that can be heated, cooled or  
29 moisturized (directly or indirectly) and combined with  
30 natural elements like rice, sand, aromas, herbs, and  
31 magnets as already described.

32 A toy Koala bear, for instance, may be placed  
33 around the neck with its body anatomically shaped to  
34 cover the upper back, shoulders and neck area. It

50349/22 "U1E0E

1 would be of non-flammable material filled with herbs,  
2 grains etc. and heated in a microwave for  
3 approximately 2 minutes, depending on the size and  
4 ingredient. An aromatic essence could also be added  
5 to it. Roman chamomile, for example, can be applied  
6 directly to the bear covering or placed in a small  
7 container with a filter insert.

8 For stomach discomforts or lower back pain, a  
9 flat large thermo-toy may be used. In addition,  
10 inserts containing magnets and/or battery operated  
11 vibrators could be inserted.

12 The present invention is also intended to cover  
13 objects used for natural alignment of the body to  
14 relax back muscles and relieve pressure points. It  
15 may be in a removable, washable, soft plush-like  
16 material. An elongated dolphin, for instance, made of  
17 anatomically designed or memory foam, would fit every  
18 contour of the body to support the head, neck, spine,  
19 knees, ankles and joints. It contains a removable  
20 filling made of sand, rice or a gel pack heated or  
21 cooled internally or externally with an aromatic  
22 insert to help promote sleep and relieve tension and  
23 stiffness. Pockets can be filled with magnets, herb  
24 saturated materials, or massage vibrators to help  
25 relieve complaints and to enhance healthy sleeping  
26 habits.

27 The present toys are generally filled with  
28 healing ingredients in separate inserts but can also  
29 be filled directly, depending on their use and  
30 application. The combination of different modules and  
31 the application of warming or cooling effects together  
32 with modules for smelling, touching, seeing, tasting  
33 or listening gives the present toy a special ability  
34 to comfort and help relieve aches and pain. It also

60345732-012202

1 promote healing, relaxation, and sleeping, while  
2 concealing the healing substances necessary to help  
3 its users. A therapeutic toy also gives a child  
4 something to hug, cuddle and squeeze with enjoyment.

5 Examples of therapeutic accessories include all  
6 kind of bags, pocketbooks, folders, briefcases, head  
7 coverings, hand and footwear (such as gloves, shoes,  
8 insoles), bands, belts and jewelry. Each resembles  
9 the actual intended use of a product with an  
10 additional benefit of some naturopathic abilities to  
11 comfort its users. All the embodiments comprise the  
12 same universal inserts and are adapted to its  
13 embodiment and the needs of the individual user. A  
14 ladies handbag is described as well as a head covering  
15 insoles and shoes, bands and the like. Gloves filled  
16 with heated or cooled herbed essences and/or magnets  
17 and accupressure balls or bands may be applied to  
18 different parts of the body.

19 Another embodiment includes naturopathic bedding  
20 and applies the same principles. This includes  
21 naturopathic mattresses combining a pillow within the  
22 mattress body with heating and cooling elements.  
23 Integrating a warming blanket, and/or essence  
24 cartridge, and using orthopedic foam which may  
25 incorporate magnets and vibrators and/or herbal  
26 compresses at accupressure points may be attached with  
27 a screw-on/snap-on mechanism onto a blanket. Covers,  
28 chair inserts and anatomically shaped devices may be  
29 used as partial or whole body supports and provide  
30 needed relief for aches or tension after an injury.

31 Fashionable naturopathic clothing incorporating  
32 magnets, bioelectromagnetic elements (sound, light,  
33 ionizers) accupressure devices, herbal inserts, aroma  
34 and hot/cold flat (gel packs)

6034973E "GILESCUE"

1 or the like also anticipated as being within the  
2 spirit and scope of the invention.

3

4 DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS

5

6 The invention is a decorative object (such as a  
7 toy, a game, picture, chair, a pullover, a hat, a  
8 wall, carpet, CD player, computer or music keyboard,  
9 with incorporated therapeutic devices for treating  
10 individuals without it appearing to others that they  
11 are obtaining treatment. As seen in Figures 1-12 and  
12 17-54 and especially in Figures 1-3, a decorative toy  
13 animal 50 is shown on the back of a person 51 and is  
14 shown in the nature of a plush toy cat having upper  
15 arms 52 and lower arms 53 which allow the plush toy's  
16 therapeutic device 50 to fit onto a person's back  
17 similar to a backpack with the arms 52 and 53 wrapping  
18 around the shoulder and arms of the individual 51.  
19 The therapeutic toy 50 has fasteners 54 for holding  
20 the toy on the person's 51 back and includes an inner  
21 module 55 which can be a loose granular material or  
22 other material which will form fit to the individual's  
23 back and which, advantageously, allows heating or  
24 cooling of the material for radiating heat for a  
25 period after the material has been heated. Granular  
26 solids can include grains, beans, seeds, grasses,  
27 barks, or ordinary rice as well as sand, stone, salts  
28 and minerals and can also include water or oil mixes  
29 or gels for retaining the heat or the lack of heat for  
30 treating the individual. A foamed polymer material 56  
31 can be form fitted around the module 55 and may be a  
32 foam having a memory to align with the body as well as  
33 to form an insulation layer over the module 55. The  
34 therapeutic toy 50 may have a storage pocket 57 as

60349732.012202

1 well as a reflective material cover 58 and might also  
2 include a holder 60 in which an aromatic essence  
3 and/or ions, sound etc. can be released into the air  
4 adjacent to the person's face. Additional treatment  
5 can be obtained with a plurality of magnets 61, as  
6 shown in Figure 1, the area can also contain massage  
7 vibrators or ball-shaped devices for applying pressure  
8 to the person's body while the person is walking,  
9 sitting and/or leaning against it. Advantageously,  
10 the therapeutic decorative object 50 can appear to be  
11 a toy while camouflaging its therapeutic values and a  
12 back pad for adults or vest for pets.

13 Turning to Figures 4-8, another embodiment of the  
14 therapeutic attachment is illustrated in the form of  
15 a seating attachment 62 which has a seat portion 63  
16 and a back portion 64 as well as a neck wrap portion  
17 65. The seating portion 63 and back portion 64 are  
18 spaced with a large groove 66. This allows a person  
19 sitting on the seat portion and leaning against the  
20 back portion, as seen in Figure 6, to have their spine  
21 fit into the groove 66 to relieve pressure on the  
22 spine. The neck portion 65 can then wrap around a  
23 person's neck, as seen in Figure 6, and may be a  
24 decorative toy animal 67 or the like. Advantageously,  
25 the seat object 62 can be folded, as seen in Figure 5,  
26 for portability. The seat portion 63, the back  
27 portion 64, and the neck portion 65 can be enhanced  
28 with other modules, such as shown in Figure 7, where  
29 the neck portion has a material 70 specially designed  
30 for receiving an aromatic or other chemical 68 which  
31 is dispensed and provides an aromatic essence around  
32 the person's head. In addition, heating or cooling  
33 materials can be placed in the seat 63 and the back 64  
34 and the neck 67 and a magnet bioelectromagnetic

60345732 012203

1 element or the like can be positioned, as desired, and  
2 accupressure ball-shaped nodules can be positioned for  
3 pressing against pressure points of the individual.  
4 Massage vibrators can also be incorporated into the  
5 back or seat portion that can be activated through the  
6 pressure of the body or a switch.

7 Turning to Figures 9-12, a therapeutic mattress  
8 71 is illustrated made of a polymer foam material  
9 which has a memory and reshapes itself from the body  
10 heat so that the resting mattress 71 takes the shape  
11 of a person's body, as illustrated in Figures 10 and  
12 11. The mattress may be of one continuous piece, as  
13 shown in Figure 11, or in modular portions, as shown  
14 in Figure 10. In addition, a special aromatic holding  
15 material 73 is incorporated for receiving the aromatic  
16 essence 74 for the person 72 to breathe while he is  
17 resting or sleeping. Also, an absorbent material 74,  
18 can have the essence applied thereto, as seen in  
19 Figure 11, which can then be inserted into a slot 75  
20 just beneath the individual's 72 head.

21 As seen in Figure 11, the form fitting mattress  
22 allows the spine of the individual 72 to maintain a  
23 straight line. As shown in Figure 12, the spine is  
24 maintained in a straight position by the reshaping of  
25 the mattress surface. Also as shown in Figure 11, the  
26 heated material 76, such as flax seed, rice, or  
27 grains, can provide heat therapy to the person 72 and  
28 an electric blanket 77 can be incorporated into the  
29 mattress surface as desired above the foam mattress.

30 Turning to Figures 17, 18, 19, 20 and 21, another  
31 embodiment of a toy 80 is illustrated in the nature of  
32 a toy porpoise for a child 81 in Figure 17 and  
33 supporting an adult 82 in Figure 21. The porpoise is  
34 shaped with a head portion 83 for cuddling and support

1 of the neck while a tail portion 84 is specifically  
2 shaped to provide support between the legs. In  
3 addition, an aromatic essence supporting material 85  
4 is located in the head for the individual 81 and 82 to  
5 breathe. A special heating material 87 can be placed  
6 within the middle of the therapeutic animal 80 and may  
7 be surrounded in a form fitting foam polymer casing  
8 87. As seen in Figure 20, the shape of the porpoise,  
9 when being held and supported, helps keep the spine  
10 aligned while providing the aromatic essence and heat  
11 to the individual 81 or 82 relieving tension, aches  
12 and e.g. cold symptoms.

13 Turning now to Figures 22 and 23, a decorative  
14 teddy bear 90 has a decorative head 91 and arms 92,  
15 which can be wrapped around an individual or carried  
16 over their shoulder as desired. It may include  
17 massaging vibrators 94, as shown in Figure 22, and  
18 also may have an essence holder 96 for receiving an  
19 essence 97 for sliding into a slot 98 within the  
20 dispenser 95. A hollowed out area 100 allows the  
21 essence to be distributed by the dispenser 95 which  
22 also has heating elements 101 for dispensing the  
23 essence and distributing cold air throughout the area  
24 of the therapeutic toy 90. It will, of course, be  
25 clear that magnets and other naturopathic elements at  
26 any layer within the decorative object body can also  
27 be distributed.

28 Turning to Figures 24-28, a therapeutic shoe and  
29 ankle band is illustrated in which accupressure points  
30 of a person's foot and ankle are shown, as illustrated  
31 in Figures 24 and 25, with the accupressure nodules  
32 102 mounted to the base of a pad or shoe 103, as shown  
33 in Figures 26 and 27, apply pressure to the points, as  
34 illustrated in Figure 24. In addition, the pressure

603497 SE. 01 EEUE

1 points can be attached to an ankle band 103. The shoe  
2 104 has an insert 105 in Figure 28 which has both  
3 pressure points and an essence 106 holding surface on  
4 the pad 105 and it may also include accupressure  
5 elements, essence, magnets etc. as desired. The same  
6 is incorporated into a sandal as shown in Figure 29.

7 Turning to Figures 31-36, the therapeutic modules  
8 are incorporated into a hat 106 having a brim 107 with  
9 an absorbent essence holding surface 108. The essence  
10 109 can be applied and positioned in front of a  
11 person's face for the evaporation and dispensing of  
12 the essence to a person directly over their nose, as  
13 seen in Figure 36. Also available in the hat is a  
14 therapeutic band 110 which may have accupressure  
15 nodules 111 incorporated, along with magnets 112 and  
16 an essence supporting material 113, for holding the  
17 essence 109. The band can be filled with instant  
18 hot/cold packets or grains and herbs heated or cooled  
19 externally, or through the rays of the sun. The band  
20 can be attached, as shown in Figure 36, with a VELCRO  
21 114, as seen in Figure 35.

22 Turnings to Figures 37-39, a handbag 115 is  
23 utilized for supporting the therapeutic modules and is  
24 held by a person 116 sitting in a chair 117, as seen  
25 in Figure 37. The handbag can have heating and  
26 cooling material 118 on one side and may have an  
27 essence dispensing surface 120 on the top. The other  
28 side can support a massaging or vibrating surface 121  
29 and can retain magnets, accupressure modules, or  
30 massage vibrators so the person holding the bag 115,  
31 as shown in Figure 37, can hold the bag in either  
32 direction for obtaining a plurality of therapeutic  
33 treatments simultaneously even while traveling.

34

SECRET

1 Turning to Figures 40-45, a therapeutic mattress  
2 125 for an animal 126 is illustrated having a slot 127  
3 for receiving an essence filter 128 for the essence  
4 130. The mattress 125 for the animal 126 can also  
5 have a heating pad 131 and can be wrapped around the  
6 individual dog, as shown in Figure 43, with the  
7 supporting cover 132. An animal ankle wrap 133 is  
8 illustrated in Figure 45 while a therapeutic wrap 34  
9 is illustrated in Figure 44. Figure 42 shows the  
10 microwave heating of heat pad insert.

11 Referring to Figures 46-49, another embodiment is  
12 illustrated in which athletic decorative bands 140 can  
13 be on an athlete's 141 head while having a therapeutic  
14 module 142 wrapped around the person's arm and shin  
15 143. Each of the wraps, as well as the athletic  
16 clothing 144, can have accupressure nodules 145  
17 attached therein at specific points. They may also  
18 have magnets 146 positioned within the clothing and  
19 may have a specially absorbent material 147 for  
20 receiving an essence 148 near the person's head in  
21 both a top 150 and a jacket 151. Parts 152 may have  
22 pressure modules 153 as well as a sprayed on essence  
23 154. The products include naturopathic jeans that  
24 help relive cellulite. Heated naturopathic gloves  
25 shawls and head covers. Figure 46 illustrates some of  
26 the accupressure points in a person.

27 Referring to Figure 50, a corner of a room 160 is  
28 illustrated having wall outlets 161 for providing hot  
29 or cold air along with an aromatic dispersion therein  
30 being fed into the room. It may also provide a  
31 therapeutic sound in the room. Furniture in the room  
32 including the carpet 162, the sofa 163 as well as the  
33 lamp 164 can all be provided with therapeutic covers  
34 which can be electrically heated and can contain or

1 have added thereto naturopathic ingredients for  
2 dispensing heat with aromatic vapors. Pillow 165 may  
3 also contain moisture, magnets, and the like to  
4 provide a person with therapeutic aromas and  
5 naturopathic treatment while resting on the sofa.  
6 Figure 51 illustrates a wall unit 166 which can be  
7 mounted to a wall or placed on a table and includes a  
8 relaxing scenic image 167 and a side mounted speaker  
9 168 for delivering relaxing sound which can also be  
10 keyed to a changing image 167. An air fan 170 can  
11 direct air through a filter 71 which may also have an  
12 aromatic essence placed therein for dispensing within  
13 the room. The therapeutic module 166 may have an  
14 electrical cord 172 for attaching to an electrical  
15 receptacle in a home.

16 Referring to Figure 52, a rolled-up pad of  
17 material 175 is illustrated having a plurality of  
18 strips 176 and a plurality of magnets 177 or other  
19 inserts attached into the strips. The pad is made of  
20 a material for receiving aromatic essence 178  
21 thereinto for generating the aromatic inhalants from  
22 the rolled up material 175. The material 175 can be  
23 used to make clothes, furniture covers or as a mat to  
24 cover a surface but can also be cut and shaped and  
25 used to wrap toys, for instance, which can then be  
26 held by a person. The material can be sprayed with a  
27 spray 180 to provide a multi-therapeutic pad which can  
28 be taken with an individual while traveling.

29 Figure 53 illustrates a table 181 having built-in  
30 therapeutic dispensing devices including a speaker 182  
31 for dispensing pleasing therapeutic sounds and an  
32 aromatic dispensing unit having a fan 183 directing  
33 air through a filter 184 having aromatic essences  
34 placed thereon for dispensing from openings in the

BO34973E-01E202

1 table top or from a side air dispenser 185. The table  
2 top 186 can have an optical image thereon which can be  
3 a continuously changing image designed for optical  
4 relaxation or be a source of heating or cooling.

5 Figure 53 illustrates a chess board 187 having  
6 chess pieces 188 which have incorporated magnets heat  
7 and/or aromatic essence dispensers. Each chess piece  
8 188 can have an essence supporting and dispensing  
9 material 190 with an aromatic essence material added  
10 thereto for dispensing while a person is playing  
11 chess. Similarly as seen in Figure 54, a deck of  
12 playing cards 191 can be made out of non-flammable  
13 material and be warmed in a microwave prior to the  
14 game and have a dispensing surface 192 added thereto  
15 which can have an aromatic or other essence added  
16 thereto for dispensing into the air and body while a  
17 person is playing cards.

18 It should be clear at this time that a decorative  
19 object can be utilized as camouflage to cover a  
20 plurality of therapeutic treatment devices. The  
21 present invention is not to be limited to the forms  
22 shown but is to be considered illustrative rather than  
23 restrictive.
